# 2 List of packages

| Name               | Comment   |
|--------------------|---|
| ANCILLARY_SERVICES | Ancillary Service Contract Data   |
| ASOFFER            | Offer data for Ancillary Service Contracts  |
| BIDS               | Energy and Market Based FCAS Offers   |
| BILLING_CONFIG     | Configuration data for the Billing Process  |
| BILLING_RUN        | Results from a published Billing Run. The settlement data and billing run data are updated daily between 6am and 8am for AEMO's prudential processes. In a normal week, AEMO publishes one PRELIM, one FINAL and two REVISION runs in addition to the daily runs. |
|                    | Each billing run is uniquely identified by contract year, week no and bill run no.  |
| CONFIGURATION      | MMS Data Model Configuration Management and Control   |
| DEMAND_FORECASTS   | Regional Demand Forecasts and Intermittent Generation forecasts.  |
| DISPATCH           | Results from a published Dispatch Run   |
| FORCE_MAJEURE      | Market Suspensions and administer pricing event data  |
| GD_INSTRUCT        | General Dispatch Instruction data   |
| GENERIC_CONSTRAINT | Generic Constraint Standing Data and Invocations  |
| IRAUCTION          | Inter-regional Residue Auction data   |
| MARKET_CONFIG      | Standing data for the market  |
| MARKET_NOTICE      | Market Notice data  |
|                    |   |

24/03/2021 Page 7 of 117

| MCC_DISPATCH             | Results from the Marginal Constraint Cost (MCC) re-run of the dispatch process. The MCC forms part of the part of the AER"s "Electricity transmission network service providers Service target performance incentive Scheme" |
|--------------------------|--|
| METER_DATA               | Wholesale market aggregated Meter data   |
| MREVENT                  | Mandatory Restrictions Event data  |
| MTPASA                   | Results from a published Medium Term PASA Run and regionaggregate offered PASA Availability of scheduled generators  |
| P5MIN                    | Results from a published Five-Minute Predispatch Run   |
| PARTICIPANT_REGISTRATION | Participant registration data  |
| PDPASA                   | The PDPASA package provides a 30-minute solving process to the Market systems  |
|                          | The current methodology for calculating reserves in the PreDispatch timeframe is determined in a post processing step using a heuristic calculation based the results and Interconnector limits from the PreDispatch run.    |
|                          | The calculation is a reserve assessment based on the PASA solver similar to existing ST and MT PASA business processes   |
|                          | The process reflects all intra-regional and inter-regional network constraints as an input to the process  |
|                          |  |
| PRE_DISPATCH             | Results from a published Predispatch Run   |
|                          | Storage options  |
|                          | There are 2 ways to define the Pre-dispatch table primary keys (PKs) to define which data is loaded to the database and which data is retained:  |
|                          | Option 1 (default)   |
|                          | Overwrite older records when they are succeeded by later versions for the same entity and period. This is the Data Model default and results in the consumption of far less storage. Data Model updates                      |

24/03/2021 Page 8 of 117

issued by AEMO target this configuration so participants implementing option 2a or 2b must maintain their changes when AEMO releases a new Data Model version.

PredispatchLoad: DateTime, DUID

PredispatchInterconnectorRes: DateTime, InterconnectorID,

PredispatchPrice: DateTime, RegionID

PredispatchPriceSensitivities: DateTime, RegionID

PredispatchInterSensitivities: InterconnectorID, DateTime

PredispatchRegionsum: DateTime, RegionID

#### Option 2a

Retain only the Pricing records for tables relating to Price data and Physical records for tables relating to Physical data (e.g. targets). Approximately 50 times more storage volumes than option 1.

PredispatchLoad: PredispatchSeqNo, DateTime, DUID

PredispatchInterconnectorRes: PredispatchSeqNo, DateTime, InterconnectorID.

PredispatchPrice: PredispatchSeqNo, DateTime, RegionID

PredispatchPriceSensitivities: PredispatchSeqNo, DateTime,

RegionID

PredispatchInterSensitivities: PredispatchSeqNo, DateTime,

InterconnectorID

PredispatchRegionsum: PredispatchSeqNo, DateTime, RegionID

#### Option 2b

Retain both Physical and Pricing data for Intervention runs. If Intervention cases are stored in entirety, you must select the data carefully. The logic is the same as for Dispatch, i.e. Intervention Pricing is always where Intervention = 0 and Physical data is where Intervention = PredispatchCaseSolution.Intervention for the same PredispatchSegNo.

Doubles the storage of option 2a but ONLY for Intervened cases.

PredispatchLoad: PredispatchSeqNo, Intervention, DateTime, DUID

PredispatchInterconnectorRes: PredispatchSeqNo, Intervention,DateTime, InterconnectorID,

PredispatchPrice: PredispatchSeqNo, Intervention, DateTime, RegionID

PredispatchPriceSensitivities: PredispatchSeqNo, Intervention, DateTime, RegionID

PredispatchInterSensitivities: PredispatchSeqNo, Intervention, DateTime, InterconnectorID

PredispatchRegionsum: PredispatchSeqNo, Intervention,

24/03/2021 Page 9 of 117

|                   | DateTime, RegionID  |
|-------------------|---|
|                   | Notes:  |
|                   | The data in the PredispatchIS file is always ordered so the pdrLoader writes the relevant data first and discards the subsequent irrelevant data, or writes the subsequent data, depending on how the PKs are defined.  |
|                   | You may order the PKs in a different order, depending on your local requirements. Any decision to change the PK column composition or order must consider the functional and performance impacts to existing applications or queries.                                 |
|                   | The pdrLoader caches PK definitions for performance reasons so any change to the PKs requires a restart of the application.   |
|                   | The TRANSACTION_TYPE default in the PDR_REPORT_RECORDS management tables for PREDISPATCH* tables is UPDATE-INSERT. You can modify this to INSERT for Option 2b, as the attempt to first perform an update becomes redundant. This can improve load performance.       |
|                   |   |
| PRUDENTIALS       | Prudential Management   |
| RESERVE_DATA      | Energy and FCAS reserve requirements  |
| SETTLEMENT_CONFIG | Configuration and input data for the Settlements Process  |
| SETTLEMENT_DATA   | Results from a published Settlements Run. The settlement data and billing run data are updated daily between 6am and 8am for AEMO's prudential processes. In a normal week, AEMO publishes one PRELIM, one FINAL and two REVISION runs in addition to the daily runs. |
| STPASA_SOLUTION   | Results from a published Short Term PASA Run  |
| TRADING_DATA      | 30 minute Trading interval results  |
| HISTORICAL TABLES | These tables are no longer used   |
| NETWORK           | Configuration data for the physical network   |

Instructions for MVAr Dispatch

## 3 Description of the model MMS Data Model v5.0 Oracle

#### **Background**

The MMS Data Model is the definition of the interface to participants of data published by AEMO from the NEM system. A database conforming to the MMS Data Model can contain a local copy of all current participant-specific data recorded in the main NEM production database. The target databases have been called such names as the Participant Database, the Participant InfoServer and the Replica Database.

The MMS Data Model includes database tables, indexes and primary keys. The model is currently exposed as a physical model, so is different in presentation for each RDBMS. However, the same logical model underlies all the physical models published by AEMO.

The MMS Data Model is the target model for products transferring data from AEMO to each participant. Current product supplied by AEMO for data transfer is Participant Data Replication (PDR), with some support for the superseded Parser.

Compatibility of the transfer products with the MMS Data Model is the responsibility of those products and their configuration. AEMO's intention is to supply the data transfer products preconfigured to deliver data consistent with the MMS Data Model, noting differences where they occur (e.g. for historical reasons).

#### **Entity Diagrams**

The entity diagrams show the key columns. Relationships have now been included in many cases.

#### Note

The National Electricity Market registration classification of Yarwun Power Station Unit 1 (dispatchable unit ID: YARWUN\_1) is market non-scheduled generating unit. However, it is a condition of the registration of this unit that the Registered Participant complies with some of the obligations of a Scheduled Generator. This unit is dispatched as a scheduled generating unit with respect to its dispatch offers, targets and generation outputs. Accordingly, information about YARWUN\_1 is reported as scheduled generating unit information.

# 7 Package: BIDS

Name BIDS

Comment Energy and Market Based FCAS Offers

### 7.1 List of tables

| Name            | Comment   | Visibility                  |
|-----------------|---|-----------------------------|
| BIDDAYOFFER     | BIDDAYOFFER shows the Energy and Ancillary Service bid data for each Market Day. BIDDAYOFFER is the parent table to BIDOFFERPERIOD. BIDDAYOFFER is a child table to BIDOFFERFILETRK | Private; Public<br>Next-Day |
| BIDDAYOFFER_D   | BIDDAYOFFER_D shows the public summary of the energy and FCAS offers applicable in the Dispatch for the intervals identified. BIDDAYOFFER_D is the parent table to BIDPEROFFER_D.   | Public                      |
| BIDOFFERFILETRK | BIDOFFERFILETRK shows<br>an audit trail of all files<br>submitted containing an<br>FCAS bid, including corrupt<br>bids and rebids.  | Private                     |
| BIDOFFERPERIOD  | BIDOFFERPERIOD shows<br>5-minute period-based<br>Energy and Ancillary Service<br>bid data.BIDOFFERPERIOD<br>is a child table of<br>BIDDAYOFFER                                      | Private; Public<br>Next-Day |
| BIDPEROFFER     | BIDPEROFFER shows<br>period-based Energy and<br>Ancillary Service bid data.<br>BIDPEROFFER is a child<br>table of BIDDAYOFFER.  | Private; Public<br>Next-Day |

24/03/2021 Page 16 of 117

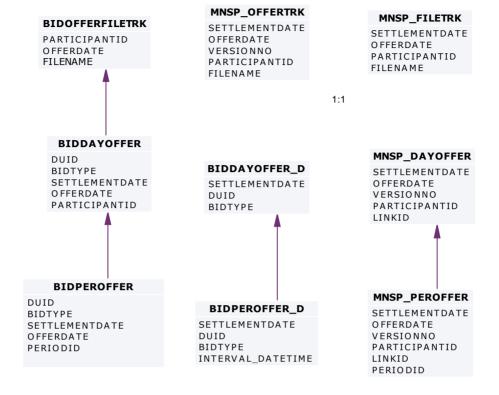

| BIDPEROFFER_D       | BIDPEROFFER_D shows the public summary of the energy and FCAS offers applicable in the Dispatch for the intervals identified. BIDPEROFFER_D is the child to BIDDAYOFFER_D.  | Public                      |
|---------------------|---|-----------------------------|
| MNSP_BIDOFFERPERIOD | MNSP_BIDOFFERPERIOD shows availability for 5-minute periods for a specific Bid and LinkID for the given Trading Date and period. MNSP_BIDOFFERPERIOD is a child to MNSP_DAYOFFER and links to BIDOFFERFILETRK for 5MS Bids. | Private; Public<br>Next-Day |
| MNSP_DAYOFFER       | MNSP_DAYOFFER updates as bids are processed. All bids are available as part of next day market data. MNSP_DAYOFFER is the parent table to MNSP_BIDOFFERPERIOD, and joins to BIDOFFERFILETRK for 5MS Bids.                   | Private; Public<br>Next-Day |
| MNSP_FILETRK        | MNSP_FILETRK shows all MNSPOFFERS transmitted to the MMS system.  | Private                     |
| MNSP_OFFERTRK       | MNSP_OFFERTRK records all valid MNSPOFFERS loaded into the MMS system. The authorised date reflects the date and time of the load. MNSP_OFFERTRK is key for tracking MNSP bid submission.                                   | Private; Public<br>Next-Day |
| MNSP_PEROFFER       | MNSP_PEROFFER shows period by period availability and other period data pertaining to a specific bid and LinkID for the given Settlement Date.  | Private; Public<br>Next-Day |
|                     | MNSP_PEROFFER is a child to MNSP_DAYOFFER and links to  |                             |

## 9 Package: BILLING\_RUN

Name BILLING\_RUN

Comment Results from a published Billing Run. The settlement data and billing run

data are updated daily between 6am and 8am for AEMO's prudential processes. In a normal week, AEMO publishes one PRELIM, one FINAL

and two REVISION runs in addition to the daily runs.

Each billing run is uniquely identified by contract year, week no and bill run

no.

### 9.1 List of tables

| Name                           | Comment  | Visibility |
|--------------------------------|--|------------|
| BILLING_APC_COMPENSATION       | Billing result table for APC compensation payments.  | Private    |
| BILLING_APC_RECOVERY           | Billing result table for recovery of APC compensation payments   | Private    |
| BILLING_CO2E_PUBLICATION       | Carbon Dioxide Intensity Index publication table   | Public     |
| BILLING_CO2E_PUBLICATION_TRK   | Carbon Dioxide Intensity<br>Index publication tracking<br>table  | Public     |
| BILLING_DAILY_ENERGY_SUMMARY   | Billing result table containing daily summary data for customer and generator energy amounts   | Private    |
| BILLING_DIRECTION_RECON_OTHER  | Billing reconciliation result table for both provisional and final directions  | Public     |
| BILLING_DIRECTION_RECONCILIATN | Billing reconciliation result<br>table for both provisional and<br>final directions using the FPP<br>methodology (prior to 1st<br>July 2011) | Public     |
| BILLING_EFTSHORTFALL_AMOUNT    | The billing shortfall run amounts  | Private    |

| BILLING_RES_TRADER_RECOVERY    | Billing result table for reserve trader contract recovery   | Private |
| BILLING_SECDEP_INTEREST_PAY    | The interest amount for security deposit calculated by billing, based on whether it is a fixed/floating rate  | Private |
| BILLING_SECDEP_INTEREST_RATE   | The DAILY interest rates used by billing when calculating the interest amount   | Public  |
| BILLING_SECDEPOSIT_APPLICATION | The security deposit application details  | Private |
| BILLINGAPCCOMPENSATION         | BILLINGAPCCOMPENSATI ON shows Administered Price Cap (APC) compensation amounts for the billing period. Data is for each participant by region.             | Private |
| BILLINGAPCRECOVERY             | BILLINGAPCRECOVERY shows the Administered Price Cap (APC) Recovery for the billing period. Data is for each participant by region.                          | Private |
| BILLINGASPAYMENTS              | BILLINGASPAYMENTS shows Ancillary Service payments for each billing period by each of the Ancillary Service types for each participant's connection points. | Private |
| BILLINGASRECOVERY              | BILLINGASRECOVERY shows participant charges for Ancillary Services for the  | Private |

24/03/2021 Page 24 of 117

|                             | billing period. This view shows the billing amounts for Ancillary Service Recovery.   |         |
|-----------------------------|---|---------|
| BILLINGCPDATA               | BILLINGCPDATA shows energy quantity and \$ value purchased per participant connection point.  | Private |
| BILLINGDAYTRK               | BILLINGDAYTRK is key for matching settlement versions with billing runs. BILLINGDAYTRK displays the billrunnos per billing week, and the settlement version numbers per settlement day comprising the billrunno.          | Public  |
| BILLINGFEES                 | BILLINGFEES presents pool fees applied to the statement, per billing run.   | Private |
| BILLINGFINANCIALADJUSTMENTS | BILLINGFINANCIALADJUST MENTS contains any manual adjustments included in the billing run.   | Private |
| BILLINGGENDATA              | BILLINGGENDATA shows<br>the total energy sold and<br>purchased per participant<br>transmission connection<br>point for a billing period.  | Private |
| BILLINGINTERRESIDUES        | BILLINGINTERRESIDUES shows interregion residues payable to NSP.   | Private |
| BILLINGINTRARESIDUES        | BILLINGINTRARESIDUES shows intra-region settlement residue details for each Transmission Network Service Provider participant by region.  | Private |
| BILLINGIRAUCSURPLUS         | BILLINGIRAUCSURPLUS supports the Settlements Residue Auction, by showing the weekly billing Interconnector Residue (IR) payments as calculated for each bill run for Network Service Providers (NSPs) from the amount not | Private |

24/03/2021 Page 25 of 117

|                         | auctioned.  |         |
|-------------------------|---|---------|
| BILLINGIRAUCSURPLUSSUM  | BILLINGIRAUCSURPLUSS UM contains Auction fees and Settlements Residue Auction distribution that may arise from unpurchased auction units that accrue to Transmission Network Service Providers.   | Private |
| BILLINGIRFM             | BILLINGIRFM shows billing amounts associated with Industrial Relations Forced Majeure events for each participant.  | Private |
| BILLINGIRNSPSURPLUS     | BILLINGIRNSPSURPLUS supports the Settlements Residue Auction (SRA), by showing the weekly billing Interconnector Residue (IR) payments as calculated for each bill run for Transmission Network Service Providers (TNSP) from the amount paid by participants (i.e. derogated amounts). | Private |
| BILLINGIRNSPSURPLUSSUM  | BILLINGIRNSPSURPLUSSU<br>M contains derogated<br>payments made to TNSPs<br>arising from the Settlements<br>Residue Auction process.   | Private |
| BILLINGIRPARTSURPLUS    | BILLINGIRPARTSURPLUS supports the Settlements Residue Auction, by showing the weekly billing SRA distribution to Auction participants by Contract Identifier.   | Private |
| BILLINGIRPARTSURPLUSSUM | BILLINGIRPARTSURPLUSS UM supports the Settlements Residue Auction, by showing the weekly billing SRA distribution and associated fees to Auction participants.  | Private |
| BILLINGPRIORADJUSTMENTS | BILLINGPRIORADJUSTME<br>NTS sets out prior period<br>adjustments and associated<br>interest inserted in   | Private |

24/03/2021 Page 26 of 117

|                          | subsequent Final Statements arising from Revision Statement postings.   |         |
|--------------------------|---|---------|
| BILLINGREALLOC           | BILLINGREALLOC shows reallocation contract values in each billing run, where participants have used reallocations.  | Private |
| BILLINGREALLOC_DETAIL    | Billing Reallocation Data aggregated by REALLOCATIONID for each billing run over the billing week.  | Private |
| BILLINGREGIONEXPORTS     | BILLINGREGIONEXPORTS sets out the region summary table of overall energy exported to and from each region for each billing run.   | Public  |
| BILLINGREGIONFIGURES     | BILLINGREGIONFIGURES sets out additional summary region details including ancillary service amounts for each billing run.   | Public  |
| BILLINGREGIONIMPORTS     | BILLINGREGIONIMPORTS sets out the region summary table of overall energy imported to and from each region for each billing run.   | Public  |
| BILLINGRUNTRK            | BILLINGRUNTRK identifies the Statement type (i.e. Status of PRELIM, FINAL, REVISE) and date of the BillRunNo posted, per WeekNo. This provides a further extension of tracking data from the BILLINGDAYTRK table. | Public  |
| BILLINGSMELTERREDUCTION  | BILLINGSMELTERREDUCTI ON shows the smelter reduction payment (only applies to participants with Victorian customer connection points).  | Private |
| BILLRESERVETRADERPAYMENT | Details of the RERT Usage and Availability Payments made to the participant.  | Private |

24/03/2021 Page 27 of 117

| BILLRESERVETRADERRECOVERY | Provides details of the RERT<br>Recovery Amount for the<br>Market Customers.   | Private |
|---------------------------|--|---------|
| BILLWHITEHOLE             | BILLWHITEHOLE shows white hole payments based on participant vs region demand. | Private |

# 9.2 Diagram: Entities: Billing Run

24/03/2021 Page 29 of 117

# 10 Package: DEMAND\_FORECASTS

Name DEMAND\_FORECASTS

Comment Regional Demand Forecasts and Intermittent Generation forecasts.

### 10.1 List of tables

| Name                           | Comment  | Visibility                  |
|--------------------------------|--|-----------------------------|
| DEMANDOPERATIONALACTUAL        | Shows Actual Operational Demand for a particular date time interval.   | Public                      |
| DEMANDOPERATIONALFORECAST      | Shows Forecast Operational Demand for a particular date time interval.   | Public                      |
| INTERMITTENT_CLUSTER_AVAIL     | A submission of Elements Unavailable for an intermittent generating unit cluster, by Trading Day and Trading Interval  | Private; Public<br>Next-Day |
| INTERMITTENT_CLUSTER_AVAIL_DAY | Summary record for an Elements Unavailable submission for an intermittent generating unit cluster for a Trading Day  | Private; Public<br>Next-Day |
| INTERMITTENT_DS_PRED           | Unconstrained Intermittent<br>Generation Forecasts (UIGF)<br>for Dispatch  | Private; Public<br>Next-Day |
| INTERMITTENT_DS_RUN            | Unconstrained Intermittent<br>Generation Forecasts (UIGF)<br>for Dispatch.   | Private; Public<br>Next-Day |
| INTERMITTENT_GEN_FCST          | Identifying record for a given forecast of an intermittent generation. This table is the version table for the INTERMITTENT_GEN_FCS T_DATA table which stores the individual forecast values | Private                     |
| INTERMITTENT_GEN_FCST_DATA     | Stores the forecast generation (MW) for each interval within a given   | Private                     |

24/03/2021 Page 30 of 117

|                            | forecast of an intermittent generator.   |                             |
|----------------------------|--|-----------------------------|
| INTERMITTENT_GEN_LIMIT     | A submission of Upper MW<br>Limit for an intermittent<br>generating unit, by Trading<br>Day and Trading Interval   | Private; Public<br>Next-Day |
| INTERMITTENT_GEN_LIMIT_DAY | Summary record for an Upper MW Limit submission for an intermittent generating unit for a Trading Day  | Private; Public<br>Next-Day |
| INTERMITTENT_P5_PRED       | Unconstrained Intermittent<br>Generation Forecasts (UIGF)<br>for 5-Minute Pre-dispatch   | Private                     |
| INTERMITTENT_P5_RUN        | Unconstrained Intermittent<br>Generation Forecasts (UIGF)<br>for 5-Minute Pre-dispatch   | Private                     |
| MTPASA_INTERMITTENT_AVAIL  | A submission of expected plant availability for intermittent generators for use in MTPASA intermittent generation forecasts  | Private                     |
| MTPASA_INTERMITTENT_LIMIT  | A submission of expected maximum availability for intermittent generators for use in MTPASA intermittent generation forecasts  | Private                     |
| PERDEMAND                  | PERDEMAND sets out the regional demands and MR schedule data for each half-hour period. PERDEMAND is a child table to RESDEMANDTRK.  | Public                      |
| RESDEMANDTRK               | RESDEMANDTRK defines the existence and versioning information of a forecast for a specific region and trading date.  | Public                      |
|                            | RESDEMANDTRK and PERDEMAND have a parent/child relationship, and are for defined forecast regional demands since market start. RESDEMANDTRK defines the existence and versioning |                             |

24/03/2021 Page 31 of 117

|                     | information of a forecast for a specific region and trading date. PERDEMAND defines the numerical forecast values for each trading interval of a the trading day for that region. A complete trading day forecast for one region consists of one RESDEMANDTRK record and 48 PERDEMAND records. |        |
|---------------------|--|--------|
| ROOFTOP_PV_ACTUAL   | Estimate of regional Rooftop<br>Solar actual generation for<br>each half-hour interval in a<br>day   | Public |
| ROOFTOP_PV_FORECAST | Regional forecasts of<br>Rooftop Solar generation<br>across the half-hour intervals<br>over 8 days   | Public |

# 11 Package: DISPATCH

Name DISPATCH

Comment Results from a published Dispatch Run

## 11.1 List of tables

| Name                         | Comment  | Visibility                  |
|------------------------------|--|-----------------------------|
| CONSTRAINTRELAXATION_OCD     | CONSTRAINTRELAXATION _OCD contains details of interconnector constraints and unit ancillary service constraints relaxed in the over-constrained dispatch (OCD) re-run for this interval (if there was one).  Note: INTERVENTION is not included in CONSTRAINTRELAXATION _OCD, since the relaxation of the same constraint is the same amount in both intervened and non- intervened cases. | Public                      |
|                              |  |                             |
| DISPATCH_CONSTRAINT_FCAS_OCD | FCAS constraint solution from OCD re-run.  | Public                      |
| DISPATCH_FCAS_REQ            | DISPATCH_FCAS_REQ shows Dispatch Constraint tracking for Regional FCAS recovery.   | Public                      |
| DISPATCH_INTERCONNECTION     | Inter-regional flow information common to or aggregated for regulated (i.e. not MNSP) Interconnectors spanning the From-Region and To-Region - NB only the physical run is calculated'   | Public                      |
| DISPATCH_LOCAL_PRICE         | Sets out local pricing offsets associated with each DUID connection point for each dispatch period. Note that  | Private; Public<br>Next-Day |

24/03/2021 Page 34 of 117

|                           | from 2014 Mid year release<br>only records with non-zero<br>Local_Price_Adjustment<br>values are issued   |                             |
|---------------------------|---|-----------------------------|
| DISPATCH_MNSPBIDTRK       | DISPATCH_MNSPBIDTRK shows the MNSP bid tracking, including the bid version used in each dispatch run for each MNSP Interconnector Link. The table identifies which bids from MNSP_DAYOFFER and MNSP_BIDOFFERPERIOD were applied.  | Private; Public<br>Next-Day |
| DISPATCH_MR_SCHEDULE_TRK  | DISPATCH_MR_SCHEDUL E_TRK records the Mandatory Restrictions Acceptance Schedule applied to this dispatch interval for this region.  DISPATCH_MR_SCHEDUL E_TRK is populated by the Dispatch process and records the MR Offer Stack applied in each dispatch interval. DISPATCH_MR_SCHEDUL E_TRK is used by Settlements to calculate payments according to the correct MR offer stack. | Public                      |
| DISPATCH_PRICE_REVISION   | An audit trail of price changes on the DISPATCHPRICE table (i.e. for 5 minute dispatch prices for energy and FCAS).   | Public                      |
| DISPATCH_UNIT_CONFORMANCE | DISPATCH_UNIT_CONFOR MANCE details the conformance of a scheduled units operation with respect to a cleared target on dispatch interval basis.  Data is confidential  | Private                     |
| DISPATCH_UNIT_SCADA       | Dispatchable unit MW from SCADA at the start of the dispatch interval. The table includes all scheduled and   | Public                      |

24/03/2021 Page 35 of 117

|                           | semi-scheduled (and non-<br>scheduled units where<br>SCADA is available)   |                             |
|---------------------------|--|-----------------------------|
| DISPATCHBLOCKEDCONSTRAINT | DISPATCH Blocked Constraints lists any constraints that were blocked in a dispatch run. If no constraints are blocked, there will be no rows for that dispatch run.  | Public                      |
| DISPATCHCASESOLUTION      | DISPATCHCASESOLUTION shows information relating to the complete dispatch run. The fields in DISPATCHCASESOLUTION provide an overview of the dispatch run results allowing immediate identification of conditions such as energy or FCAS deficiencies.  | Public                      |
| DISPATCHCONSTRAINT        | DISPATCHCONSTRAINT sets out details of all binding and interregion constraints in each dispatch run. Note: invoked constraints can be established from GENCONSETINVOKE. Binding constraints show as marginal value >\$0. Interconnector constraints are listed so RHS (SCADA calculated limits) can be reported. | Private; Public<br>Next-Day |
| DISPATCHINTERCONNECTORRES | DISPATCHINTERCONNECT ORRES sets out MW flow and losses on each interconnector for each dispatch period, including fields for the Frequency Controlled Ancillary Services export and import limits and extra reporting of the generic constraints set the energy import and export limits.                        | Public                      |
| DISPATCHLOAD              | DISPATCHLOAD set out the current SCADA MW and target MW for each dispatchable unit, including relevant Frequency Control Ancillary Services (FCAS)   | Private; Public<br>Next-Day |

24/03/2021 Page 36 of 117

|                           | enabling targets for each five minutes and additional fields to handle the new Ancillary Services functionality. Fast Start Plant status is indicated by dispatch mode.   |                             |
|---------------------------|---|-----------------------------|
| DISPATCHOFFERTRK          | DISPATCHOFFERTRK is the energy and ancillary service bid tracking table for the Dispatch process. The table identifies which bids from BIDDAYOFFER and BIDOFFERPERIOD were applied for a given unit and bid type for each dispatch interval.  | Private; Public<br>Next-Day |
| DISPATCHPRICE             | DISPATCHPRICE records 5 minute dispatch prices for energy and FCAS, including whether an intervention has occurred, or price override (e.g. for Administered Price Cap). DISPATCHPRICE updates when price adjustments occur, in which case the new price is written to the RRP field, and the old price to the ROP field as an audit trail. | Public                      |
| DISPATCHREGIONSUM         | DISPATCHREGIONSUM sets out the 5-minute solution for each dispatch run for each region, including the Frequency Control Ancillary Services (FCAS) services provided. Additional fields are for the Raise Regulation and Lower Regulation Ancillary Services plus improvements to demand calculations.                                       | Public                      |
| INTERMITTENT_FORECAST_TRK | Uniquely tracks which<br>Intermittent Generation<br>forecast was used for the<br>DUID in which Dispatch run   | Private; Public<br>Next-Day |
| NEGATIVE_RESIDUE          | Shows the inputs provided to<br>the Negative Residue<br>Constraints in the Dispatch<br>horizon  | Public                      |

24/03/2021 Page 37 of 117

# 12 Package: FORCE\_MAJEURE

Name FORCE\_MAJEURE

Comment Market Suspensions and administer pricing event data

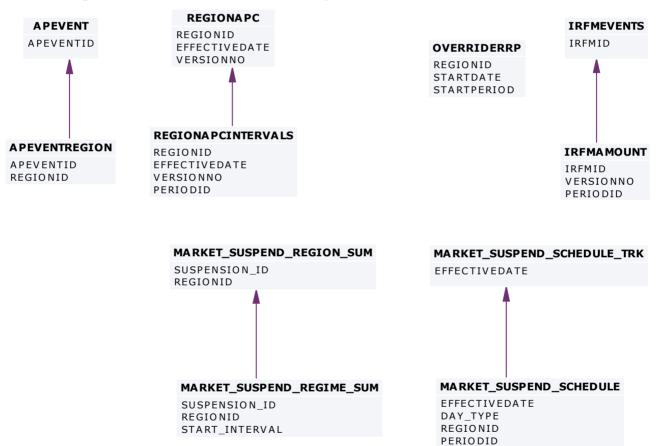

## 12.1 List of tables

| Name                        | Comment  | Visibility |
|-----------------------------|--|------------|
| APEVENT                     | APEVENT is the driving data defining the existence and timeframes of an administered pricing event.      | Public     |
| APEVENTREGION               | APEVENTREGION is the Region detail for an administered pricing event defined through APEVENT.            | Public     |
| IRFMAMOUNT                  | IRFMAMOUNT sets out settlement amounts associated with Industrial Relations Forced Majeure events.       | Public     |
| IRFMEVENTS                  | IRFMEVENTS sets out specific Industrial Relations Forced Majeure events.                                 | Public     |
| MARKET_SUSPEND_REGIME_SUM   | Tracks the evolution of pricing regimes applied to the suspended region and from which Dispatch Interval | Public     |
| MARKET_SUSPEND_REGION_SUM   | Summary of Market<br>Suspension timings  | Public     |
| MARKET_SUSPEND_SCHEDULE     | Trading prices that will apply in the event of a market suspension event updated weekly.                 | Public     |
| MARKET_SUSPEND_SCHEDULE_TRK | Parent table for pricing regimes used in suspensions   | Public     |
| OVERRIDERRP                 | OVERRIDERRP shows details of override price  | Public     |

24/03/2021 Page 39 of 117

|                    | periods.  |        |
|--------------------|---|--------|
| REGIONAPC          | REGIONAPC defines<br>Administered Price profiles<br>(Energy and FCAS) for a<br>region.                              | Public |
| REGIONAPCINTERVALS | REGIONAPCINTERVALS contains Administered Price profiles (Energy and FCAS) applicable to each interval for a region. | Public |

24/03/2021 Page 40 of 117

# 13 Package: GD\_INSTRUCT

Name GD\_INSTRUCT

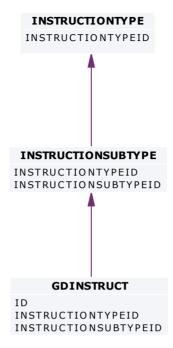

Comment General Dispatch Instruction data

## 13.1 List of tables

| Name               | Comment  | Visibility |
|--------------------|--|------------|
| GDINSTRUCT         | GDINSTRUCT shows all manually issued dispatch instructions for a dispatchable unit. Ancillary Service instructions are to enable and to disable (i.e. 2 separate instructions) a service. Non-conforming units are also instructed via this facility. However, this facility is not the same as the market notice. | Public     |
| INSTRUCTIONSUBTYPE | Each Dispatch instruction (GD instruct) has a type and subtype. INSTRUCTIONSUBTYPE, together with INSTRUCTIONTYPE, sets out valid instruction types.   | Public     |
| INSTRUCTIONTYPE    | Dispatch instruction (GD instruct) has types and subtypes. INSTRUCTIONTYPE, together with INSTRUCTIONSUBTYPE, sets out valid instruction types.  | Public     |

# 14 Package: GENERIC\_CONSTRAINT

Name GENERIC\_CONSTRAINT

Comment Generic Constraint Standing Data and Invocations

## 14.1 List of tables

| Name            | Comment  | Visibility |
|-----------------|--|------------|
| EMSMASTER       | EMSMASTER provides a description of the SCADA measurements that are associated with the SPD_ID points utilised in generic equation RHS terms   | Public     |
| GENCONDATA      | GENCONDATA sets out the generic constraints contained within a generic constraint set invoked in PASA, predispatch and dispatch.  Fields enable selective application of invoked constraints in the Dispatch, Predispatch, ST PASA or MT PASA processes. | Public     |
| GENCONSET       | GENCONSET sets out generic constraint sets that are invoked and revoked, and may contain many generic constraints (GENCONDATA).  | Public     |
| GENCONSETINVOKE | GENCONSETINVOKE provides details of invoked and revoked generic constraints. GENCONSETINVOKE is the key table for determining what constraints are active in dispatch, predispatch and PASA.   | Public     |
|                 | GENCONSETINVOKE also indicates whether constraints   |            |

24/03/2021 Page 43 of 117

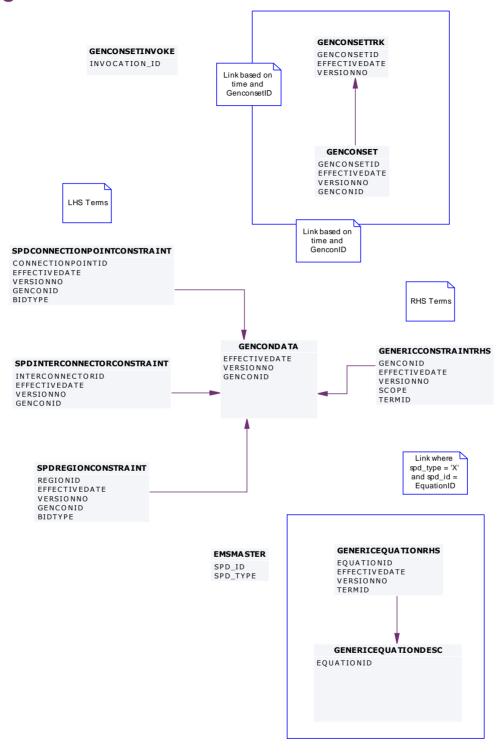

|                              | are for interconnector limits, ancillary services, etc.   |        |
|------------------------------|---|--------|
| GENCONSETTRK                 | GENCONSETTRK assists in determining the correct version of a generic constraint set that has been invoked in GENCONSETINVOKE.   | Public |
| GENERICCONSTRAINTRHS         | GENERICCONSTRAINTRH S sets out details of generic constraint Right Hand Side (RHS) formulations for dispatch (DS), predispatch (PD) and Short Term PASA (ST). GENERICCONSTRAINTRH S also includes general expressions (EQ) used in the dispatch, predispatch and PASA time frames. GENERICCONSTRAINTRH S replaces data previously available via the "Constraint Library" Excel spreadsheet. | Public |
| GENERICEQUATIONDESC          | GENERICEQUATIONDESC defines a generic equation identifier with a description. The formulation of the generic equation is detailed in GENERICEQUATIONRHS.  | Public |
| GENERICEQUATIONRHS           | GENERICEQUATIONRHS stores the formulation of commonly used Generic Constraint Right Hand Side Equations referenced from Generic Constraint Right Hand Side definitions stored in GENERICCONSTRAINTRH S. The Generic Equation definitions are versioned and the latest effective version is applied to the dispatch process.   | Public |
| SPDCONNECTIONPOINTCONSTRAINT | SPDCONNECTIONPOINTC ONSTRAINT sets out details  | Public |

24/03/2021 Page 44 of 117

|                             | of connections point constraints issued in dispatch, predispatch and STPASA.  |        |
|-----------------------------|---|--------|
| SPDINTERCONNECTORCONSTRAINT | SPDINTERCONNECTORCO<br>NSTRAINT contains details<br>on the interconnector<br>constraint factors used in<br>dispatch, predispatch and<br>STPASA. The details set a<br>LHS value. | Public |
| SPDREGIONCONSTRAINT         | SPDREGIONCONSTRAINT contains details on region demand constraint factors used in dispatch. SPDREGIONCONSTRAINTS ets a LHS value.  | Public |

24/03/2021 Page 45 of 117

# 15 Package: IRAUCTION

Name IRAUCTION

Comment Inter-regional Residue Auction data

## 15.1 List of tables

| Name                     | Comment  | Visibility |
|--------------------------|--|------------|
| AUCTION                  | AUCTION holds auction<br>details. AUCTION is new in<br>March 2003 to support SRA<br>Inter-Temporal Linking.  | Public     |
| AUCTION_CALENDAR         | AUCTION_CALENDAR holds the definitions of each auction quarter in a contract year. AUCTION_CALENDAR supports the Settlement Residue Auction.   | Public     |
| AUCTION_IC_ALLOCATIONS   | AUCTION_IC_ALLOCATION S supports the Settlement Residue Auction by providing the basis for setting up contracts for individual tranches. AUCTION_IC_ALLOCATION S shows the default definitions for the total number of units and proportion applicable to each directional interconnector for a specified auction quarter. | Public     |
| AUCTION_REVENUE_ESTIMATE | AUCTION_REVENUE_ESTI MATE supports the Settlement Residue Auction, by holding the evaluator's estimates of revenue for each month of a given quarter.  | Public     |
|                          | Since reserve prices are no longer applicable from the end of 2001, zero is used as a default to avoid rewriting the system.   |            |

24/03/2021 Page 47 of 117

| AUCTION_REVENUE_TRACK     | AUCTION_REVENUE_TRA CK supports the Settlement Residue Auction, by holding the tracking information for each evaluator's estimates for a given quarter. The status field is dynamic and is used for selection of estimates to be published.  | Public  |
|---------------------------|--|---------|
| AUCTION_RP_ESTIMATE       | AUCTION_RP_ESTIMATE supports the Settlement Residue Auction, by holding the evaluator's estimates of revenue prices for a given quarter.  Since reserve prices are no longer applicable from the end of 2001, zero is used as a default to avoid rewriting the system.                               | Public  |
| AUCTION_TRANCHE           | AUCTION_TRANCHE supports the Settlement Residue Auction, by holding the default definitions for the percentage number of units allocated and dates applicable to each tranche for a specified auction quarter. This information provides the basis for setting up contracts for individual tranches. | Public  |
| RESIDUE_BID_TRK           | RESIDUE_BID_TRK supports the Settlement Residue Auction, by detailing which bid was used for which SRA Contract run.   | Private |
| RESIDUE_CON_DATA          | RESIDUE_CON_DATA supports the Settlement Residue Auction, by holding for each participant the confidential data from the auction.  RESIDUE_CON_DATA joins to RESIDUE_PUBLIC_DATA and RESIDUE_TRK.  | Private |
| RESIDUE_CON_ESTIMATES_TRK | RESIDUE_CON_ESTIMATE S_TRK supports the Settlement Residue Auction,  | Public  |

24/03/2021 Page 48 of 117

|                         | by holding the tracking details of the estimates used to generate the reserve price for each contract.  |         |
|-------------------------|---|---------|
| RESIDUE_CON_FUNDS       | RESIDUE_CON_FUNDS supports the Settlement Residue Auction, by holding the fund details for each contract.   | Public  |
| RESIDUE_CONTRACTS       | RESIDUE_CONTRACTS supports the Settlement Residue Auction, by holding the contract details for each period for which a residue contract will be offered.  | Public  |
| RESIDUE_FUNDS_BID       | RESIDUE_FUNDS_BID supports the Settlement Residue Auction, by showing the fund details for each SRA bid by each Participant.  | Private |
| RESIDUE_PRICE_BID       | RESIDUE_PRICE_BID supports the Settlement Residue Auction, holding the unit and bid price details for each participant.   | Private |
| RESIDUE_PRICE_FUNDS_BID | RESIDUE_PRICE_FUNDS_ BIDshows the bids producing the auction outcome, without exposing participant-specific details. RESIDUE_PRICE_FUNDS_ BID is new in March 2003 to support SRA Inter-Temporal Linking.   | Public  |
| RESIDUE_PUBLIC_DATA     | RESIDUE_PUBLIC_DATA shows the public auction results.  RESIDUE_PUBLIC_DATA supports the Settlement Residue Auction, by holding the public details of the auction for a given contract. RESIDUE_PUBLIC_DATA joins to RESIDUE_CON_DATA and RESIDUE. | Public  |

24/03/2021 Page 49 of 117

| RESIDUE_TRK  RESIDUECONTRACTPAYMENTS | RESIDUE_TRK supports the Settlement Residue Auction, by showing the tracking records for different residue auction runs. RESIDUE_TRK joins to RESIDUE_PUBLIC_DATA and RESIDUE_CON_DATA.  RESIDUECONTRACTPAYM ENTS shows Settlement Residue Auction payment | Public Private |
|--------------------------------------|--|----------------|
| RESIDUEFILETRK                       | Participant notifications.  RESIDUEFILETRK records all Settlement Residue Auction offers submitted by participants.  | Private        |
| SRA_CASH_SECURITY                    | Records the Cash Security details provided by an SRA Auction Participant as collateral to cover their Trading Position in the SRA market   | Private        |
| SRA_FINANCIAL_AUC_MARDETAIL          | This table stores details of the margins returned to the participants.   | Private        |
| SRA_FINANCIAL_AUC_MARGIN             | Records the amount of Cash<br>Security required to be held<br>by an Auction Participant<br>after settlement  | Private        |
| SRA_FINANCIAL_AUC_RECEIPTS           | Records details of the<br>Cancelled Units and their<br>value for the Auction<br>Participant  | Private        |
| SRA_FINANCIAL_AUCPAY_DETAIL          | Records details of the SRA financial auction payment   | Private        |
| SRA_FINANCIAL_AUCPAY_SUM             | Records a summary of the Auction payment amount  | Private        |
| SRA_FINANCIAL_RUNTRK                 | Records details of the settlement process for the cancellation and purchase of SRA Auction Units   | Public         |
| SRA_OFFER_PRODUCT                    | Holds the Product details for each Offer File submitted by each SRA Auction  | Private        |

24/03/2021 Page 50 of 117

|                              | Participant.   |         |
|------------------------------|--|---------|
| SRA_OFFER_PROFILE            | Holds the data of an SRA<br>Auction Participant Offer<br>Submission.   | Private |
| SRA_PRUDENTIAL_CASH_SECURITY | Records the Cash Security details provided by an SRA Auction Participant as collateral to cover their Trading Position in the SRA market                                     | Private |
| SRA_PRUDENTIAL_COMP_POSITION | The prudential position of each company at the date and time of a specific prudential run  | Private |
| SRA_PRUDENTIAL_EXPOSURE      | Records details of the<br>Prudential Exposure of an<br>SRA Auction Participant   | Private |
| SRA_PRUDENTIAL_RUN           | Records the prudential run details for each prudential date  | Public  |
| VALUATIONID                  | VALUATIONID shows the identifiers and descriptions of the valuers submitting estimates of upcoming settlement residues. VALUATIONID supports the Settlement Residue Auction. | Public  |

# 16 Package: MARKET\_CONFIG

Name MARKET\_CONFIG

Comment Standing data for the market

## 16.1 List of tables

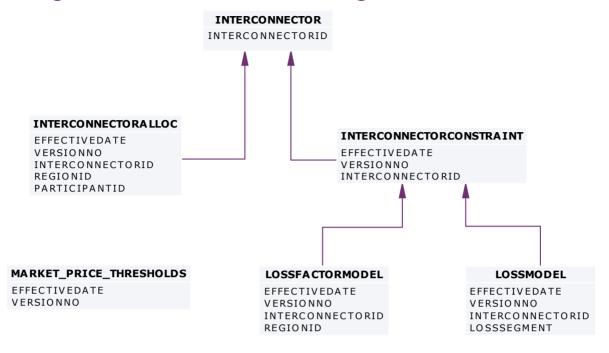

| Name                     | Comment   | Visibility |
|--------------------------|---|------------|
| BIDTYPES                 | BIDTYPES, together with the associated tracking data in BIDTYPESTRK, define a set of ancillary services with bidding parameters from a given date.  | Public     |
|                          | BIDTYPES is static data describing each type of bid quantity, the number of applicable bands, how many days ahead a price lock down becomes effective and the validation rule that applies. |            |
| BIDTYPESTRK              | BIDTYPESTRK, together with the associated data in BIDTYPES, define a set of ancillary services with bidding parameters from a given date.   | Public     |
| INTERCONNECTOR           | INTERCONNECTOR sets out valid identifiers for each interconnector.  | Public     |
| INTERCONNECTORALLOC      | INTERCONNECTORALLOC shows allocations of interconnector residues to Network Service Providers.  | Private    |
| INTERCONNECTORCONSTRAINT | INTERCONNECTORCONST<br>RAINT sets out<br>Interconnector limit data<br>used as defaults in dispatch,<br>predispatch and STPASA<br>and used by SPD in   | Public     |

24/03/2021 Page 53 of 117

|                         | calculating flows. INTERCONNECTORCONST RAINT includes an additional field to restrict an interconnector from support transfer of FCAS.     |         |
|-------------------------|--|---------|
| INTRAREGIONALLOC        | INTRAREGIONALLOC shows allocations of intra-<br>regional residues to participants.   | Private |
| LOSSFACTORMODEL         | LOSSFACTORMODEL sets<br>out the demand coefficients<br>for each interconnector, used<br>by LP Solver modelling of<br>interconnector flows. | Public  |
| LOSSMODEL               | LOSSMODEL sets out segment breakpoints in loss model for each interconnector, used by LP Solver modelling of interconnector flows.         | Public  |
| MARKET_PRICE_THRESHOLDS | MARKET_PRICE_THRESH OLDS sets out the market cap , floor and administered price thresholds applying to the electricity market              | Public  |
| REGION                  | REGION sets out valid region IDs.  | Public  |
| REGIONSTANDINGDATA      | REGIONSTANDINGDATA sets out standing region data including the region reference node.  | Public  |
| TRANSMISSIONLOSSFACTOR  | TRANSMISSIONLOSSFACT OR shows the Transmission Loss factors applied at each connection point.  | Public  |

24/03/2021 Page 54 of 117

# 21 Package: P5MIN

Name P5MIN

Comment Results from a published Five-Minute Predispatch Run

## 21.1 List of tables

| Name                     | Comment   | Visibility       |
|--------------------------|---|------------------|
| P5MIN_BLOCKEDCONSTRAINT  | P5MIN Blocked Constraints lists any constraints that were blocked in a P5MIN run. If no constraints are blocked, there will be no rows for that 5 minute predispatch run.   | Public           |
| P5MIN_CASESOLUTION       | The five-minute predispatch (P5Min) is a MMS system providing projected dispatch for 12 Dispatch cycles (one hour). The 5-minute Predispatch cycle runs every 5-minutes to produce a dispatch and pricing schedule to a 5-minute resolution covering the next hour, a total of twelve periods.  P5MIN_CASESOLUTION shows one record containing results pertaining to the entire solution. | Public           |
| P5MIN_CONSTRAINTSOLUTION | The Five-Minute Pre-Dispatch (P5Min) is a MMS system providing projected dispatch for 12 Dispatch cycles (one hour). The Five-Minute Pre-dispatch cycle runs every 5-minutes to produce a dispatch and pricing schedule to a 5-minute resolution covering the next hour, a total of twelve periods.   | Private & Public |

24/03/2021 Page 64 of 117

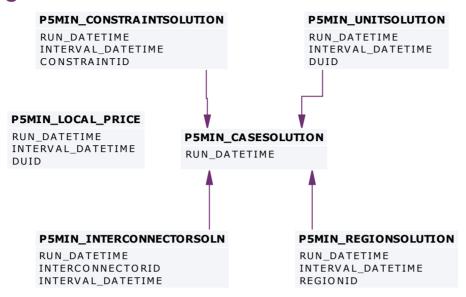

|                          | P5MIN_CONSTRAINTSOLU TION shows binding and violated constraint results from the capacity evaluation, including the RHS value.   |        |
|--------------------------|--|--------|
| P5MIN_INTERCONNECTORSOLN | The five-minute predispatch (P5Min) is a MMS system providing projected dispatch for 12 Dispatch cycles (one hour). The 5-minute Predispatch cycle runs every 5-minutes to produce a dispatch and pricing schedule to a 5-minute resolution covering the next hour, a total of twelve periods.  P5MIN_INTERCONNECTO RSOLN sets out the results of the capacity evaluation for Interconnectors, including the calculated limits for the interval. | Public |
| P5MIN_INTERSENSITIVITIES | Price Sensitivies for 5MinPD solution. New solution every 5 minutes. Current Scenarios defined in P5MIN_SCENARIODEMAN DTRK/P5MIN_SCENARIOD EMAND   | Public |
| P5MIN_LOCAL_PRICE        | Sets out local pricing offsets<br>associated with each DUID<br>connection point for each<br>dispatch period  | Public |
| P5MIN_PRICESENSITIVITIES | Price Sensitivies for 5MinPD solution. New solution every 5 minutes. Current Scenarios defined in P5MIN_SCENARIODEMAN DTRK/P5MIN_SCENARIOD EMAND   | Public |
| P5MIN_REGIONSOLUTION     | The five-minute predispatch (P5Min) is a MMS system providing projected dispatch for 12 Dispatch cycles (one hour). The 5-minute Predispatch cycle runs every  | Public |

24/03/2021 Page 65 of 117

|                         | 5-minutes to produce a dispatch and pricing schedule to a 5-minute resolution covering the next hour, a total of twelve periods.  P5MIN_REGIONSOLUTION shows the results of the regional capacity, maximum surplus reserve and maximum spare capacity evaluations for each period of the study.   |         |
|-------------------------|---|---------|
| P5MIN_SCENARIODEMAND    | The P5Min scenario MW offsets   | Public  |
| P5MIN_SCENARIODEMANDTRK | Tracks the 5Min scenario offset updates across time   | Public  |
| P5MIN_UNITSOLUTION      | The five-minute predispatch (P5Min) is a MMS system providing projected dispatch for 12 Dispatch cycles (one hour). The 5-minute Predispatch cycle runs every 5-minutes to produce a dispatch and pricing schedule to a 5-minute resolution covering the next hour, a total of twelve periods.  P5MIN_UNITSOLUTION shows the Unit results from the capacity evaluations for each period of the study. | Private |

# 22 Package: PARTICIPANT\_REGISTRATION

Name PARTICIPANT\_REGISTRATION

Comment Participant registration data

## 22.1 List of tables

| Name              | Comment   | Visibility |
|-------------------|---|------------|
| BIDDUIDDETAILS    | BIDDUIDDETAILS and the associated tracking object BIDDUIDDETAILSTRK define the registration data for each ancillary service a dispatchable unit is registered to provide. The registration data is required to validate a dispatchable unit bid submitted for that ancillary service.   | Public     |
| BIDDUIDDETAILSTRK | BIDDUIDDETAILSTRK shows the tracking for the associated object BIDDUIDDETAILS. Together, BIDDUIDDETAILSTRK and BIDDUIDDETAILS define the registration data for each ancillary service a dispatchable unit is registered to provide. The registration data is required to validate a dispatchable unit bid submitted for that ancillary service. | Public     |
| DISPATCHABLEUNIT  | DISPATCHABLEUNIT sets out the unit name and type of each dispatchable unit in the market.   | Public     |
| DUALLOC           | DUALLOC cross references<br>dispatch unit identifier to<br>genset ID for each<br>participant.   | Public     |

24/03/2021 Page 68 of 117

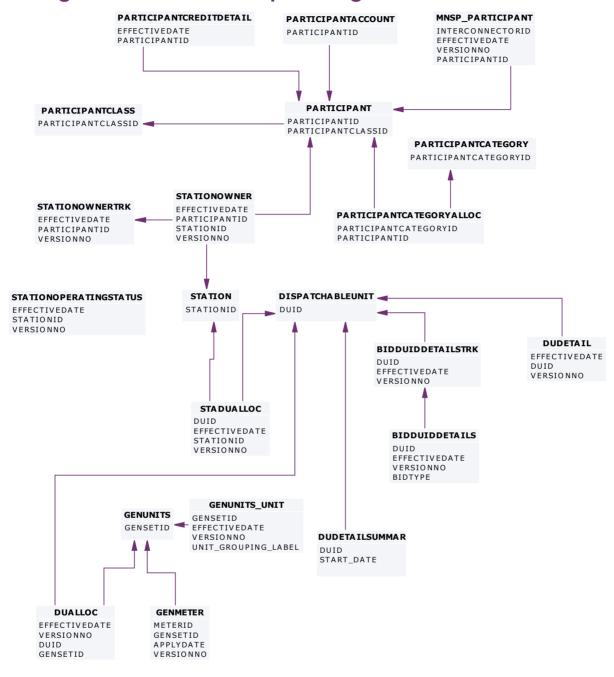

| DUDETAIL                 | DUDETAIL sets out a records specific details for each unit including start type and whether normally on or off load. Much of this data is information only and is not used in dispatch or settlements. | Public  |
|--------------------------|--|---------|
| DUDETAILSUMMARY          | DUDETAILSUMMARY sets out a single summary unit table so reducing the need for participants to use the various dispatchable unit detail and owner tables to establish generating unit specific details. | Public  |
| GENMETER                 | GENMETER shows details of generator meter sets.  | Public  |
| GENUNITS                 | GENUNITS shows Genset details for each physical unit with the relevant station.  | Public  |
| GENUNITS_UNIT            | Physical units within a Gen<br>Unit Set  | Public  |
| MNSP_INTERCONNECTOR      | MNSP_INTERCONNECTOR sets out attributes of each interconnector.  | Public  |
| MNSP_PARTICIPANT         | MNSP_PARTICIPANT registers MNSP ownership.   | Public  |
| PARTICIPANT              | PARTICIPANT sets out<br>Participant ID, name and<br>class for all participants.  | Public  |
| PARTICIPANTACCOUNT       | PARTICIPANTACCOUNT shows financial details on participants.  | Private |
| PARTICIPANTCATEGORY      | PARTICIPANTCATEGORY sets out valid participant categories.   | Public  |
| PARTICIPANTCATEGORYALLOC | PARTICIPANTCATEGORYA<br>LLOC sets out the<br>assignment of participants to<br>particular categories.   | Public  |

24/03/2021 Page 69 of 117

| PARTICIPANTCLASS        | PARTICIPANTCLASS sets out valid participant classifications.  | Public  |
|-------------------------|---|---------|
| PARTICIPANTCREDITDETAIL |   | Private |
| STADUALLOC              | STADUALLOC sets out details on the allocation of dispatchable units to particular sites or stations.  | Public  |
| STATION                 | STATION sets out valid station identifiers.   | Public  |
| STATIONOPERATINGSTATUS  | STATIONOPERATINGSTAT US sets out the operating status of each station.  | Public  |
| STATIONOWNER            | STATIONOWNER sets out the owner details of each station.  | Public  |
| STATIONOWNERTRK         | STATIONOWNERTRK shows the tracking for the associated object STATIONOWNER. Together, STATIONOWNERTRK and STATIONOWNER sets out the owner details of each station. | Public  |

24/03/2021 Page 71 of 117

## 23 Package: PRE\_DISPATCH

Name PRE\_DISPATCH

Comment Results from a published Predispatch Run

Storage options

There are 2 ways to define the Pre-dispatch table primary keys (PKs) to define which data is loaded to the database and which data is retained:

Option 1 (default)

Overwrite older records when they are succeeded by later versions for the same entity and period. This is the Data Model default and results in the consumption of far less storage. Data Model updates issued by AEMO target this configuration so participants implementing option 2a or 2b must maintain their changes when AEMO releases a new Data Model version.

PredispatchLoad: DateTime, DUID

PredispatchInterconnectorRes: DateTime, InterconnectorID,

PredispatchPrice: DateTime, RegionID

PredispatchPriceSensitivities: DateTime, RegionID

PredispatchInterSensitivities: InterconnectorID, DateTime

PredispatchRegionsum: DateTime, RegionID

Option 2a

Retain only the Pricing records for tables relating to Price data and Physical records for tables relating to Physical data (e.g. targets). Approximately 50 times more storage volumes than option 1.

PredispatchLoad: PredispatchSeqNo, DateTime, DUID

 $\label{lem:predispatch} Predispatch SeqNo,\ Date Time,$ 

InterconnectorID,

PredispatchPrice: PredispatchSeqNo, DateTime, RegionID

PredispatchPriceSensitivities: PredispatchSeqNo, DateTime, RegionID

PredispatchInterSensitivities: PredispatchSeqNo, DateTime,

InterconnectorID

PredispatchRegionsum: PredispatchSeqNo, DateTime, RegionID

Option 2b

Retain both Physical and Pricing data for Intervention runs. If Intervention

24/03/2021 Page 72 of 117

cases are stored in entirety, you must select the data carefully. The logic is the same as for Dispatch, i.e. Intervention Pricing is always where Intervention = 0 and Physical data is where Intervention = PredispatchCaseSolution.Intervention for the same PredispatchSegNo.

Doubles the storage of option 2a but ONLY for Intervened cases.

PredispatchLoad: PredispatchSeqNo, Intervention, DateTime, DUID

PredispatchInterconnectorRes: PredispatchSeqNo, Intervention,DateTime, InterconnectorID,

PredispatchPrice: PredispatchSeqNo, Intervention, DateTime, RegionID

PredispatchPriceSensitivities: PredispatchSeqNo, Intervention, DateTime, RegionID

PredispatchInterSensitivities: PredispatchSeqNo, Intervention, DateTime, InterconnectorID

PredispatchRegionsum: PredispatchSeqNo, Intervention, DateTime, RegionID

#### Notes:

The data in the PredispatchIS file is always ordered so the pdrLoader writes the relevant data first and discards the subsequent irrelevant data, or writes the subsequent data, depending on how the PKs are defined.

You may order the PKs in a different order, depending on your local requirements. Any decision to change the PK column composition or order must consider the functional and performance impacts to existing applications or queries.

The pdrLoader caches PK definitions for performance reasons so any change to the PKs requires a restart of the application.

The TRANSACTION\_TYPE default in the PDR\_REPORT\_RECORDS management tables for PREDISPATCH\* tables is UPDATE-INSERT. You can modify this to INSERT for Option 2b, as the attempt to first perform an update becomes redundant. This can improve load performance.

### 23.1 List of tables

| Name                 | Comment   | Visibility |
|----------------------|---|------------|
| PREDISPATCH_FCAS_REQ | PREDISPATCH_FCAS_RE Q shows Predispatch Constraint tracking for | Public     |

24/03/2021 Page 73 of 117

|                              | Regional FCAS<br>Requirements.   |                             |
|------------------------------|--|-----------------------------|
| PREDISPATCH_LOCAL_PRICE      | Sets out local pricing offsets<br>associated with each DUID<br>connection point for each<br>dispatch period  | Private; Public<br>Next-Day |
| PREDISPATCH_MNSPBIDTRK       | PREDISPATCH_MNSPBIDT RK shows the MNSP bid tracking, including the bid version used in each predispatch run for each MNSP Interconnector Link. PREDISPATCH_MNSPBIDT RK shows the audit trail of the bid used for each predispatch run.   | Public                      |
| PREDISPATCHBLOCKEDCONSTRAINT | PREDISPATCH Blocked Constraints lists any constraints that were blocked in a Predispatch run. If no constraints are blocked, there will be no rows for that predispatch run.   | Public                      |
| PREDISPATCHCASESOLUTION      | PREDISPATCHCASESOLU TION provides information relating to the complete predispatch run. The fields provide an overview of the dispatch run results allowing immediate identification of conditions such as energy or FCAS deficiencies.  | Public                      |
| PREDISPATCHCONSTRAINT        | PREDISPATCHCONSTRAIN T sets out constraints that are binding in each predispatch run and interconnector constraints (whether binding or not). Only binding and interconnector constraints are reported. Binding contracts have marginal value greater than \$0. Interconnector constraints are listed so RHS values can be reported for ST PASA. Constraint solutions only report fixed loading /MR constraints on the next day. | Private; Public<br>Next-Day |

24/03/2021 Page 74 of 117

| PREDISPATCHINTERCONNECTORRES  | PREDISPATCHINTERCON NECTORRES records Interconnector flows and losses for the periods calculated in each predispatch run. Only binding and interconnector constraints are reported.  Some fields are for the Frequency Controlled Ancillary Services export and | Public                      |
|-------------------------------|---|-----------------------------|
|                               | import limits and extra reporting of the generic constraint setting the energy import and export limits.  |                             |
| PREDISPATCHINTERSENSITIVITIES | PREDISPATCHINTERSENS ITIVITIES sets out the sensitivity flows for each interconnector by period.  | Public                      |
| PREDISPATCHLOAD               | PREDISPATCHLOAD shows pre-dispatch targets for each dispatchable unit, including additional fields to handle the Ancillary Services functionality. No record is written where a unit is not dispatched. PREDISPATCHLOAD shows all the results for each period.  | Private; Public<br>Next-Day |
| PREDISPATCHOFFERTRK           | PREDISPATCHOFFERTRK is for the ancillary service bid tracking of predispatch processing. PREDISPATCHOFFERTRK identifies which bids from BIDDAYOFFER and BIDOFFERPERIOD were applied for a given unit and ancillary service for each predispatch run.            | Private; Public<br>Next-Day |
| PREDISPATCHPRICE              | PREDISPATCHPRICE records predispatch prices for each region by period for each predispatch run, including fields to handle the Ancillary Services   | Public                      |

24/03/2021 Page 75 of 117

|                               | functionality.  |        |
|-------------------------------|---|--------|
| PREDISPATCHPRICESENSITIVITIES | PREDISPATCHPRICESENS ITIVITIES sets out the sensitivity prices for each region by period.                                 | Public |
| PREDISPATCHREGIONSUM          | PREDISPATCHREGIONSU M sets out the overall regional Pre-Dispatch results for base case details (excluding price).         | Public |
| PREDISPATCHSCENARIODEMAND     | PREDISPATCHSCENARIO DEMAND defines the demand offsets that are applied for each of the predispatch sensitivity scenarios. | Public |
| PREDISPATCHSCENARIODEMANDTRK  | Tracks the predispatch scenario offset updates across time  | Public |

Comment Configuration and input data for the Settlements Process

### 25.1 List of tables

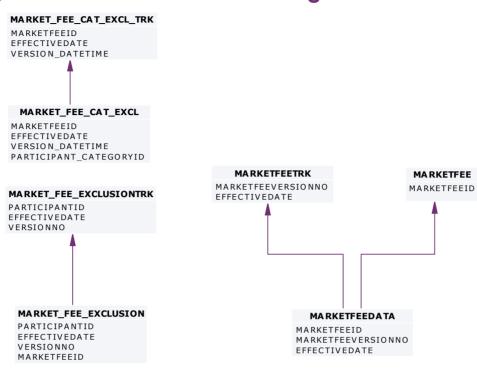

| Name                     | Comment   | Visibility |
|--------------------------|---|------------|
| ANCILLARY_RECOVERY_SPLIT | ANCILLARY_RECOVERY_S PLIT holds the actual customer portion for each service and payment type. A single EFFECTIVEDATE/VERSION NO combination applies to all services (i.e. the latest EFFECTIVEDATE/VERSION NO is not retrieved for a single service, but applies to a data set). | Public     |
| MARKET_FEE_CAT_EXCL      | Market fee exclusions for participant categories.   | Public     |
| MARKET_FEE_CAT_EXCL_TRK  | Tracking table for market fee exclusions for participant categories.  | Public     |
| MARKET_FEE_EXCLUSION     | MARKET_FEE_EXCLUSION shows the list of market fees from which a participant is excluded from funding after a particular settlement date.  | Private    |
| MARKET_FEE_EXCLUSIONTRK  | MARKET_FEE_EXCLUSION TRK shows authorisation details of participant market fee exclusion data sets.   | Private    |
| MARKETFEE                | MARKETFEE sets out fee type and period for each market fee.   | Public     |
| MARKETFEEDATA            | MARKETFEEDATA sets out actual fee rates, as adjusted from time to time.   | Public     |

24/03/2021 Page 80 of 117

| MARKETFEETRK              | MARKETFEETRK sets out versions of each market fee used and its effective date.  | Public  |
|---------------------------|---|---------|
| PARTICIPANT_BANDFEE_ALLOC | PARTICIPANT_BANDFEE_<br>ALLOC shows the market<br>fee for each<br>Participant/Participant<br>Category over time.  | Private |
| REALLOCATION              | The REALLOCATION table shows the financial transactions agreed between two participants that are settled through the AEMO pool settlements process.   | Private |
| REALLOCATIONINTERVAL      | 30-minute or (5-minute for 5MS) data comprising a single reallocation transaction.  | Private |
| SETCFG_PARTICIPANT_MPF    | SETCFG_PARTICIPANT_M PF shows the Market Participation Factors (MPF) for each participant for each connection point. The MPF values are used to determine recovery amounts for regulation FCAS. | Public  |
| SETCFG_PARTICIPANT_MPFTRK | SETCFG_PARTICIPANT_M PFTRK is the tracking table for Market Participation Factors (MPF) data stored in the SETCFG_PARTICIPANT_M PF table for each participant.                                  | Public  |

## 26 Package: SETTLEMENT\_DATA

Name SETTLEMENT\_DATA

Comment Results from a published Settlements Run. The settlement data and billing

run data are updated daily between 6am and 8am for AEMO's prudential processes. In a normal week, AEMO publishes one PRELIM, one FINAL

and two REVISION runs in addition to the daily runs.

## 26.1 List of tables

| Name                  | Comment  | Visibility |
|-----------------------|--|------------|
| DAYTRACK              | DAYTRACK identifies the actual settlement run processed for each settlement day. Settlement run is in the column EXPOSTRUNNO. Generally the number of the settlement run used in the latest statement is the maximum number. | Public     |
| SET_ APC_COMPENSATION | APC Compensation payment amounts in the Settlements timeframe  | Private    |
| SET_ APC_RECOVERY     | APC Compensation recovery amounts in the Settlements timeframe   | Private    |
| SET_ANCILLARY_SUMMARY | SET_ANCILLARY_SUMMA<br>RY summarises payments<br>for all Ancillary Services to<br>participants on the basis of<br>regions and trading intervals.   | Public     |
| SET_FCAS_PAYMENT      | SET_FCAS_PAYMENT sets<br>out the enabling payment<br>details for frequency<br>controlled Ancillary Services.   | Private    |
| SET_FCAS_RECOVERY     | SET_FCAS_RECOVERY shows reimbursements for the Frequency Control Ancillary Services (FCAS) to be recovered from participants. Beware of  | Private    |

24/03/2021 Page 83 of 117

|                         | potential confusion with the table SETFCASRECOVERY, which reports reimbursements for Frequency Control Ancillary Services Compensation (now unused). |         |
|-------------------------|--|---------|
| SET_FCAS_REGULATION_TRK | SET_FCAS_REGULATION_<br>TRK shows FCAS<br>Regulation Service<br>Constraint tracking for<br>Regional FCAS Regulation<br>recovery                      | Public  |
| SET_MR_PAYMENT          | SET_MR_PAYMENT shows trading interval payments on a dispatchable unit basis for accepted MR capacity.  | Private |
| SET_MR_RECOVERY         | SET_MR_RECOVERY shows the trading interval recovery charges on a dispatchable unit basis for spot market income from dispatch of MR capacity.        | Private |
| SET_NMAS_RECOVERY       | SET_NMAS_RECOVERY sets out the NSCAS recovery data for payments other than testing.  | Private |
| SET_NMAS_RECOVERY_RBF   | SET_NMAS_RECOVERY_R<br>BF publishes the RBF for<br>NSCAS non testing<br>payments on a half hourly<br>basis.  | Public  |
| SET_RUN_PARAMETER       | SET_RUN_PARAMETER shows the input parameters and value associated with each settlement run (e.g. Residual System Load Causer Pays Factor).           | Public  |
| SETAGCPAYMENT           | SETAGCPAYMENT sets out specific payment details for Automatic Generation Control (AGC) services by period.   | Private |
| SETAGCRECOVERY          | SETAGCRECOVERY shows reimbursements for Automatic Generation Control (AGC) Ancillary   | Private |

24/03/2021 Page 84 of 117

|                         | Services to be recovered from participants.  |         |
|-------------------------|--|---------|
| SETCPDATA               | SETCPDATA shows meter settlement data for each connection point. This is the key view for retailers to verify energy charges. A regional summary view is also provided. As the view has values for each connection point by period, for each meter data file, it is a very large view. | Private |
| SETCPDATAREGION         | SETCPDATAREGION sets out summary meter settlement data for each region.  | Public  |
| SETFCASCOMP             | SETFCASCOMP shows the compensation details for Frequency Controlled Ancillary Services (FCAS). These compensation values are calculated by a separate "what if" run of the LP Solver and entered as an unconstrained MW value into settlements.  | Private |
| SETFCASREGIONRECOVERY   | SETFCASREGIONRECOVE<br>RY shows FCAS Regional<br>Recovery Data against each<br>Trading Interval.   | Public  |
| SETGENDATA              | SETGENDATA shows meter settlement data for each generation meter point. A regional summary is also provided.   | Private |
| SETGENDATAREGION        | SETGENDATAREGION sets out summary settlement data for generation within the specified region.  | Public  |
| SETINTERVENTION         | SETINTERVENTION shows intervention settlement payment details by unit.   | Private |
| SETINTERVENTIONRECOVERY | SETINTERVENTIONRECOV<br>ERY shows intervention<br>recovery details by  | Private |

24/03/2021 Page 85 of 117

|                        | participant.   |         |
|------------------------|--|---------|
| SETINTRAREGIONRESIDUES |  | Public  |
| SETIRAUCSURPLUS        | This view supports the Settlements Residue Auction, by holding the NSP participant allocations of IRSurplus arising as a result of the unsold units for a quarter.   | Private |
| SETIRFMRECOVERY        | SETIRFMRECOVERY sets out reimbursements for Industrial Relations Force Majeure to be recovered from participants.  | Private |
| SETIRNSPSURPLUS        | This view supports the Settlements Residue Auction, by showing the TNSP participant allocations of Interconnector Residue (IR) Surplus (i.e. derogated amounts) arising as a result of the sold units for a quarter. | Private |
| SETIRPARTSURPLUS       | This view supports the Settlements Residue Auction, holding the participant allocations of IRSurplus.  | Private |
| SETIRSURPLUS           | SETIRSURPLUS records the interregional residue calculation for each interconnector and each side of the interconnector.  | Public  |
| SETLOCALAREAENERGY     | SETLOCALAREAENERGY<br>shows the UFE, AGE and<br>associated values for each<br>local area and trading<br>interval in a settlement run.  | Public  |
| SETLOCALAREATNI        | SETLOCALAREATNI shows the list of TNIs constituent to a local area in a settlement run.  | Public  |
| SETLSHEDPAYMENT        | SETLSHEDPAYMENT<br>shows specific payment<br>details for load shed services<br>by period.  | Private |

24/03/2021 Page 86 of 117

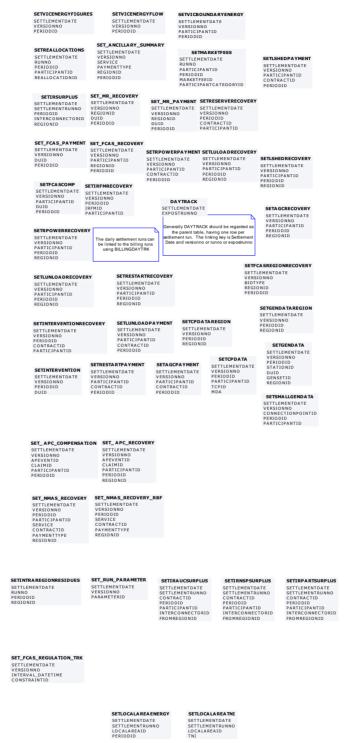

| SETLSHEDRECOVERY   | SETLSHEDRECOVERY<br>shows reimbursements for<br>Load shed Ancillary Services<br>to be recovered from<br>participants. (Data no longer<br>created for Settlement Days<br>from 01/07/2012) | Private |
|--------------------|--|---------|
| SETLULOADRECOVERY  | SETLULOADRECOVERY shows reimbursements for rapid-unit-load Ancillary Services to be recovered from participants.   | Private |
| SETLUNLOADPAYMENT  | SETLUNLOADPAYMENT shows specific payment details for rapid unit unload service.  | Private |
| SETLUNLOADRECOVERY | SETLUNLOADRECOVERY shows reimbursements for rapid unit unloading Ancillary Services to be recovered from participants.   | Private |
| SETMARKETFEES      | SETMARKETFEES shows payments for market fees for each settlement date.   | Private |
| SETREALLOCATIONS   | SETREALLOCATIONS shows the trading interval value of reallocations processed, for those participants whose reallocation submissions have been accepted by AEMO.                          | Private |
| SETRESERVERECOVERY | SETRESERVERECOVERY shows reserve recovery details.   | Private |
| SETRESTARTPAYMENT  | SETRESTARTPAYMENT<br>shows specific payment<br>details for System Restart<br>services by period.   | Private |
| SETRESTARTRECOVERY | SETRESTARTRECOVERY shows reimbursements for system restart Ancillary Services to be recovered from participants. (Data no longer created for Settlement Days from 01/07/2012)            | Private |

24/03/2021 Page 87 of 117

| SETRPOWERPAYMENT     | SETRPOWERPAYMENT<br>shows specific payment<br>details for Reactive power<br>services by period.  | Private |
|----------------------|--|---------|
| SETRPOWERRECOVERY    | SETRPOWERRECOVERY shows reimbursements for Reactive Power Ancillary Services to be recovered from participants. (Data no longer created for Settlement Days from 01/07/2012) | Private |
| SETSMALLGENDATA      | Publishes metering data and associated settlement values for with a registered Small Generator Aggregator participants connection points.                                    | Private |
| SETVICBOUNDARYENERGY | SETVICBOUNDARYENERG Y is as requested by Participants for the settlement of Victorian Vesting contracts.   | Private |
| SETVICENERGYFIGURES  | SETVICENERGYFIGURES is used in settlement of Victorian Vesting contracts.  | Public  |
| SETVICENERGYFLOW     | SETVICENERGYFLOW is used in settlement of Victorian Vesting contracts.   | Public  |

## 28 Package: TRADING\_DATA

Name TRADING\_DATA

Comment 30 minute Trading interval results

## 28.1 List of tables

| Name                | Comment  | Visibility                  |
|---------------------|--|-----------------------------|
| AVERAGEPRICE30      | Reflects the 30-minute average price (the pre-5MS trading price).  | Public                      |
| TRADINGINTERCONNECT | TRADINGINTERCONNECT shows the Interconnector flows for the 5 minutes Trading Interval.  Prior to 5 Minute Settlements, this was the average of the six 5 minute dispatch intervals within the 30 minute period.  | Public                      |
| TRADINGLOAD         | TRADINGLOAD shows half-hourly average dispatch levels, including fields to handle the Ancillary Services functionality.  | Private; Public<br>Next-Day |
| TRADINGPRICE        | TRADINGPRICE sets out 5 minutes spot market price, including fields to handle the Ancillary Services functionality. If prices are adjusted, the final price is recorded in the regional reference price (RRP) field with price before adjustment recorded in the regional original price (ROP) field.  Prior to 5 Minute Settlements, this was half-hourly spot market values, which was calculated as the average of the six 5 minute | Public                      |

24/03/2021 Page 92 of 117

|                  | dispatch intervals within the 30 minute period.   |        |
|------------------|---|--------|
| TRADINGREGIONSUM | TRADINGREGIONSUM sets out the half-hourly average regional demand and frequency control services. TRADINGREGIONSUM includes fields for the Raise Regulation and Lower Regulation Ancillary Services plus improvements to demand calculations. | Public |

## 29 Package: PDPASA

Name PDPASA

Comment The PDPASA package provides a 30-minute solving process to the

Market systems

The current methodology for calculating reserves in the PreDispatch timeframe is determined in a post processing step using a heuristic calculation based the results and Interconnector limits from the

PreDispatch run.

The calculation is a reserve assessment based on the PASA solver similar

to existing ST and MT PASA business processes

The process reflects all intra-regional and inter-regional network

constraints as an input to the process

### 29.1 List of tables

| Name                      | Comment   | Visibility |
|---------------------------|---|------------|
| PDPASA_CASESOLUTION       | The top-level table identifying a PDPASA case, reporting options applied in the case and summary results  | Public     |
| PDPASA_CONSTRAINTSOLUTION | PDPASA_CONSTRAINTSO<br>LUTION shows binding and<br>violated constraint results<br>from the capacity evaluation,<br>including the RHS value.                   | Public     |
| PDPASA_INTERCONNECTORSOLN | PDPASA_INTERCONNECT<br>ORSOLN shows the results<br>of the capacity evaluation for<br>Interconnectors, including<br>the calculated limits for the<br>interval. | Public     |
| PDPASA_REGIONSOLUTION     | The PDPASA region solution data   | Public     |

# 32 Package: NETWORK

Name NETWORK

Comment Configuration data for the physical network

### 32.1 List of tables

| Name                        | Comment   | Visibility |
|-----------------------------|---|------------|
| NETWORK_EQUIPMENTDETAIL     | NETWORK_EQUIPMENTDE TAIL Provides details on equipment that may have outages or ratings. A single piece of equipment may have multiple records if its details change.  A line will typically have at least two valid records at a time, once for each end of the line.  | Public     |
| NETWORK_OUTAGECONSTRAINTSET | NETWORK_OUTAGECONS<br>TRAINTSET lists the<br>Constraint Set or Sets that<br>are expected to be invoked<br>for the outage once it is<br>confirmed to proceed.  | Public     |
| NETWORK_OUTAGEDETAIL        | Lists asset owners planned outages for transmission equipment. This also includes details for transmission equipment that will not have an outage, but associated secondary equipment has an outage and a related constraint set may be invoked. This scenario is indicated by the ISSECONDARY field in the table | Public     |
| NETWORK_OUTAGESTATUSCODE    | NETWORK_OUTAGESTAT<br>USCODE describes the<br>different outage status codes   | Public     |
| NETWORK_RATING              | NETWORK_RATING defines  | Public     |

24/03/2021 Page 98 of 117

|                        | a list of the equipment ratings that may be used as inputs to market constraints.  If the rating is flagged as dynamic then in real-time the rating will be dynamically determined and the static value will be used as a fallback value should the dynamic value fail.  Note:  In some rare cases equipment has ratings provided from more than one TNSP. This is identified by a different SPD Id. The value used in the NEM is normally the more restrictive of the two values. |        |
|------------------------|--|--------|
| NETWORK_REALTIMERATING | The NETWORK_REALTIMERATI NG table shows the equipment rating values in MVA used as inputs to constraints in the dispatch solution. This includes values for both static and dynamic ratings. The NETWORK_RATING table can be used to determine the physical equipment the rating is for based on the SPD_ID value.   | Public |
| NETWORK_STATICRATING   | NETWORK_STATICRATING lists the static rating values that will apply for a Rating Application ID.  This data does not provide information for when the rating actually applies in the NEM. This is dependent on the Rating Application definition.  For information on the Rating Applications please refer to the information published on the AEMO website under the topic "Transmission Equipment Ratings". The  | Public |

24/03/2021 Page 99 of 117

|                          | Rating Applications are referred to as Alternate Value Application Ratings. Ratings that normally use dynamic values will also have static rating values defined. These are used as a fallback if the dynamic rating fails. |        |
|--------------------------|---|--------|
| NETWORK_SUBSTATIONDETAIL | NETWORK_SUBSTATIOND<br>ETAIL sets out the attributes<br>of sub-stations across time   | Public |

| BILLINGINTERVENTION            | BILLINGINTERVENTION shows billing intervention recovery details.  | Private |
| BILLINGINTERVENTIONREGION      | BILLINGINTERVENTIONRE<br>GION shows recovery<br>charges for region<br>intervention.   | Private |
| BILLINGRESERVERECOVERY         | BILLINGRESERVERECOVE<br>RY shows Market Reserve<br>recovery details for each<br>participant in a bill run.  | Private |
| BILLINGRESERVEREGIONRECOVERY   | BILLINGRESERVEREGION<br>RECOVERY shows Billing<br>Region Reserve region<br>recovery details for each<br>participant (by region).                            | Private |
| BILLINGRESERVETRADER           | BILLINGRESERVETRADER shows Billing Market Reserve TRADER payment details to Generators.   | Private |
| BILLINGRESERVETRADERREGION     | BILLINGRESERVETRADER<br>REGION shows Billing<br>Region Reserve Trader<br>payment details.   | Private |
| BILLINTERVENTIONRECOVERY       | BILLINTERVENTIONRECO<br>VERY shows billing market<br>intervention recovery details<br>for each participant.   | Private |
| BILLINTERVENTIONREGIONRECOVERY | BILLINTERVENTIONREGIO<br>NRECOVERY shows billing<br>region intervention recovery<br>details for each participant by<br>region.                              | Private |
| BILLSMELTERRATE                | BILLSMELTERRATE is standing data, setting out the rates used in smelter reduction calculations.   |         |
| CONNECTIONPOINT                | CONNECTIONPOINT shows all valid connection points and their type. Transmission loss factors are available for all connection points in TRANSMISSIONLOSSFACT | Public  |

24/03/2021 Page 103 of 117

|                             | OR.   |        |
|-----------------------------|---|--------|
| CONNECTIONPOINTDETAILS      | CONNECTIONPOINTDETAI LS is obsolete, since it was never populated by Participants accessing AEMO's Oracle Interface.  CONNECTIONPOINTDETAI LS was designed to show relevant details for each connection point including the responsible party, loss factor and relevant MDAs.   | Public |
| CONNECTIONPOINTOPERATINGSTA | CONNECTIONPOINTOPER<br>ATINGSTA shows whether a<br>connection point is active or<br>not.  | Public |
| CONTRACTGOVERNOR            | CONTRACTGOVERNOR became unused when Ancillary Services Review was implemented in 2001. For more details, see Change Notice 126.  CONTRACTGOVERNOR shows Governor contract details used in the settlement and dispatch of this service. Note services are dispatched as 6 and 60 raise and lower Frequency Control Ancillary Services (FCAS). Lower and raise 6 and 60 second fields are used in dispatch of services. Deadband and Droop details are used in settlements. |        |
| CONTRACTRESERVEFLAG         | CONTRACTRESERVEFLAG has never been or will be used. It was to show a period by period flag for regional or market recovery of reserve trading contract amounts.   |        |
| CONTRACTRESERVETHRESHOLD    | CONTRACTRESERVETHR ESHOLD shows reserve contract threshold details for enabling, usage and availability thresholds and rates for reserve trader   |        |

24/03/2021 Page 104 of 117

|                       | contracts.   |
|-----------------------|--|
| CONTRACTRESERVETRADER | CONTRACTRESERVETRA DER shows reserve trader contract details. Version numbers do not apply as contracts exist for specified purposes.  |
| CONTRACTUNITLOADING   | CONTRACTUNITLOADING became unused when Ancillary Services Review was implemented in 2001. For more details, see Change Notice 126.   |
|                       | CONTRACTUNITLOADING shows Unit Loading contract details used in the settlement and dispatch of this service.   |
| CONTRACTUNITUNLOADING | CONTRACTUNITUNLOADI NG shows Ancillary Service contract data for rapid generator unit unloading.   |
| DAYOFFER              | DAYOFFER sets out the participants' daily components of participant bid containing details applying for the whole day (such as prices, daily energy constraint and fast start profiles). |
|                       | To retrieve full bid details, read in conjunction with PEROFFER.   |
| DAYOFFER_D            | DAYOFFER_D sets out the participants' daily components of participant bid containing just the latest details (such as prices, daily energy constraint and fast start profiles).          |
|                       | To retrieve latest bid details, read in conjunction with PEROFFER_D.   |
| DEFAULTDAYOFFER       | DEFAULTDAYOFFER shows day-based details of participants' default bids unit for the same day.   |

24/03/2021 Page 105 of 117

| DEFAULTOFFERTRK          | DEFAULTOFFERTRK shows the file names of default offers submitted for each unit.   |                             |
|--------------------------|---|-----------------------------|
| DEFAULTPEROFFER          | DEFAULTPEROFFER shows half hourly period-based data in the default bid for each Dispatchable Unit, such as period availability, rate of change and band quantities.   |                             |
| DELTAMW                  | DELTAMW sets out the Frequency Control Ancillary Services (FCAS) requirement to be provided locally within each region and each half-hour period in a market day. Two fields specify Frequency Controlled Ancillary Services requirements to be provided locally for the new regulation ancillary services. |                             |
| DISPATCHBIDTRK           | DISPATCHBIDTRK shows the bid tracking, including the bid version used in each dispatch run for each unit. DISPATCHBIDTRK is the audit trail of the bid actually used in each dispatch.  |                             |
| DISPATCHCASE_OCD         | DISPATCHCASE_OCD shows the key data to indicate when an overconstrained dispatch (OCD) re-run actually occurred. One record per over-constrained dispatch interval.   | Public                      |
| DISPATCHCASESOLUTION_BNC | DISPATCHCASESOLUTION _BNC was discontinued on 30 September 2009. Prior: DISPATCHCASESOLUTION _BNC is the key data to indicate when a binding intra- regional network constraints (BNC) re-run actually occurred.  | Public                      |
| DISPATCHLOAD_BNC         | DISPATCHLOAD_BNC was discontinued on 30 September 2009. Prior:  | Private; Public<br>Next-Day |

24/03/2021 Page 106 of 117

|                    | DISPATCHLOAD_BNC gives binding intra-regional network constraints (BNC) re-run dispatch results for all scheduled generating units. DISPATCHLOAD_BNC has a similar structure to DISPATCHLOAD but does not repeat input type data (e.g. InitialMW, AGCStatus) since these values are available from DISPATCHLOAD. |         |
|--------------------|--|---------|
| DISPATCHTRK        | DISPATCHTRK is no longer used. DISPATCHTRK was the cross-reference between each dispatch run and SPD case run. DISPATCHTRK may be available on the InfoServer but not replicated to participant databases as it contains data duplicated in other tables.  |         |
| FORCEMAJEURE       | FORCEMAJEURE used to set out the start and end dates / periods of any force majeure event. FORCEMAJEURE is not used.   |         |
| FORCEMAJEUREREGION | FORCEMAJEUREREGION used to set out regions impacted by a force majeure event. This table is not used.  |         |
| GENUNITMTRINPERIOD | GENUNITMTRINPERIOD shows meter reading by period for each generator meter. GENUNITMTRINPERIOD covers generated power flowing into the system. It is used to calculate settlement values.   | Private |
| INTCONTRACT        | INTCONTRACT shows intervention contract details. These are specific to each intervention.  |         |
| INTCONTRACTAMOUNT  | INTCONTRACTAMOUNT shows intervention contract amounts.   |         |

24/03/2021 Page 107 of 117

| INTCONTRACTAMOUNTTRK | INTCONTRACTAMOUNTTR K shows the latest valid version of each intervention contract.   |         |
|----------------------|---|---------|
| INTERCONNMWFLOW      | INTERCONNMWFLOW shows Metered Interconnector flow data. INTERCONNMWFLOW shows the meter data provided by Meter Data Providers to MSATS.   | Public  |
|                      | Despite the name, this view shows metered energy (MWh) and not power flow (MW).   |         |
| MARKETSUSPENSION     | MARKETSUSPENSION is obsolete from 2017 End of Year DM4.27 Release.  MARKETSUSPENSION sets out a start and end periods of any market suspension and the reason.                      | Public  |
| MARKETSUSREGION      | MARKETSUSREGION is obsolete from 2017 End of Year DM4.27 Release.  MARKETSUSREGION sets out a regions affected by a market suspension.  | Public  |
| MAS_CP_CHANGE        | MAS_CP_CHANGE records pending changes to the current MAS configuration.   |         |
| MAS_CP_MASTER        | MAS_CP_MASTER shows the current MAS configuration.  |         |
| METERDATA            | METERDATA sets out a meter data for each customer connection point. METERDATA covers market load. Use the field METERRUNNO to match the meter data version for each settlement run. | Private |
| METERDATA_GEN_DUID   | Recorded actual generation of non-scheduled units   | Public  |

24/03/2021 Page 108 of 117

|                           | where SCADA data is available.   |         |
|---------------------------|--|---------|
| METERDATATRK              | METERDATATRK records meter data files submitted for each connection point on a daily basis. The same data is provided in METERDATA period by period (i.e. 48 records), whereas METERDATATRK shows one record per day for each file submitted for a connection point.                 | Private |
| MTPASA_CASE_SET           | MTPASA_CASE_SET is obsolete from 2005 End of Year Release. The RUNTYPE added to the primary key of the detail tables for MTPASA allows for the different types of runs for each case.  MTPASA_CASE_SET allows a MT PASA scenario to be linked across runs.                           | Public  |
| MTPASA_CASESOLUTION       | MTPASA_CASESOLUTION is obsolete from 2017 End of Year DM4.27 Release.  MTPASA_CASESOLUTION holds one record for each entire solution.  Change Notice 379 announced the replacement of the MT PASA data model so all MTPASAxxx tables become obsolete, replaced by MTPASA_xxx tables. | Public  |
| MTPASA_CONSTRAINTSOLUTION | MTPASA_CONSTRAINTSO LUTION is obsolete from 2017 End of Year DM4.27 Release.  The MTPASA_CONSTRAINTSO LUTION table holds the binding and violated constraint results from the capacity evaluation, including   | Public  |

24/03/2021 Page 109 of 117

|                               | the DLIC value   |        |
|-------------------------------|--|--------|
|                               | the RHS value.  Change Notice 379 announced the replacement of the MT PASA data model so all MTPASAxxx tables become obsolete, replaced by MTPASA_xxx tables.  |        |
| MTPASA_INTERCONNECTORSOLUTION | MTPASA_INTERCONNECT ORSOLUTION is obsolete from 2017 End of Year DM4.27 Release.  The MTPASA_INTERCONNECT ORSOLUTION table shows the results of the capacity evaluation for Interconnectors, including the calculated limits for the Idcblock within the day.  Change Notice 379 announced the replacement of the MT PASA data model so all MTPASAxxx tables become obsolete, replaced by MTPASA_xxx tables (see Change Notices 400, 400a and 400b). | Public |
| MTPASA_REGIONSOLUTION         | MTPASA_CASESOLUTION is obsolete from 2017 End of Year DM4.27 Release.  The MTPASA_REGIONSOLUTIO N table shows the results of the regional capacity, maximum surplus reserve and maximum spare capacity evaluations for each day and ldcblock of the study.   | Public |
| MTPASA_RESERVELIMITSOLUTION   | MTPASA_RESERVELIMITS OLUTION is obsolete from 2017 End of Year DM4.27 Release. MT PASA Solution table reporting whether a MT PASA Reserve requirement  | Public |

24/03/2021 Page 110 of 117

|                                | is binding for each day and LDC block of the run.   |
|--------------------------------|---|
| MTPASACONSTRAINTSOLUTION_D     | MTPASACONSTRAINTSOL UTION_D sets out MT PASA constraint solution results, where constraints are binding.                                  |
| MTPASAINTERCONNECTORSOLUTION_D | MTPASAINTERCONNECTO RSOLUTION_D shows interconnector results for MT PASA, shown region by region.   |
| MTPASAREGIONSOLUTION_D         | MTPASAREGIONSOLUTIO N_D shows region results for MT PASA, showing predicted demand and any capacity limits.                               |
| OARTRACK                       | OARTRACK shows an audit trail of bids for a particular settlement day. Corrupt bids do not update OARTRACK, but are just in OFFERFILETRK. |
| OFFERFILETRK                   | OFFERFILETRK shows an audit trail of all bid files submitted containing energy bids, including corrupt bids/rebids.                       |
| OFFERGOVDATA                   | OFFERGOVDATA sets out reoffers of governor (6 and 60 second FCAS) availability.   |
| OFFERULOADINGDATA              | OFFERULOADINGDATA shows reoffers of rapid unit loading capability.  |
| OFFERUNLOADINGDATA             | OFFERUNLOADINGDATA shows reoffers of rapid unit unloading capability.   |
| PASACASESOLUTION               | PASACASESOLUTION sets<br>out ST PASA case listing<br>providing details of each<br>STPASA case run.  |
| PASACONSTRAINTSOLUTION         | PASACONSTRAINTSOLUTI ON records the latest binding STPASA constraint details  |

24/03/2021 Page 111 of 117

|                            | for each period. For each solution, the latest recalculation for each period overwrites the previous entry.   |
|----------------------------|---|
| PASAINTERCONNECTORSOLUTION | PASAINTERCONNECTORS OLUTION records ST PASA interconnector solutions for the latest period.   |
| PASAREGIONSOLUTION         | PASAREGIONSOLUTION shows the Regional solution for ST PASA showing reserves for each half-hour period. This table (PASAREGIONSOLUTION_ D) shows the latest calculated result for each period.   |
| PEROFFER                   | PEROFFER contains the half-hourly period details of daily bids and rebids, to be used in conjunction with DAYOFFER. These views provide period varying details such as rate of change up (ROCUP), rate of change down (ROCDOWN) and band quantities (BANDAVAIL from 1 to 10).  PEROFFER is a child table of DAYOFFER.         |
| PEROFFER_D                 | PEROFFER_D contains the half-hourly period details of daily bids and rebids, to be used in conjunction with DAYOFFER_D. These views provide period varying details such as rate of change up (ROCUP), rate of change down (ROCDOWN) and band quantities (BANDAVAIL from 1 to 10).  PEROFFER_D is a child table of DAYOFFER_D. |
| PREDISPATCHBIDTRK          | PREDISPATCHBIDTRK contains an audit trail of bids   |

24/03/2021 Page 112 of 117

|                                | used in each predispatch<br>run. Where predispatch is<br>over 2 days, two bids are<br>listed.   |        |
|--------------------------------|---|--------|
| REALLOCATIONDETAILS            | REALLOCATIONDETAILS sets out specific reallocation agreements.  |        |
| REALLOCATIONINTERVALS          | REALLOCATIONINTERVAL<br>S identifies the the<br>reallocation agreement and<br>provides the corresponding<br>reallocation profiles<br>submitted by the participant<br>and accepted by AEMO               |        |
| REALLOCATIONS                  | REALLOCATIONS shows reallocation agreement identifiers with corresponding start and end dates of submitted reallocations as accepted by AEMO.   |        |
| REGIONFCASRELAXATION_OCD       | REGIONFCASRELAXATION _OCD contains details of regional FCAS requirements relaxed in the over- constrained dispatch (OCD) re-run (if there was one).   |        |
|                                | Note: INTERVENTION is not included in REGIONFCASRELAXATION _OCD since the relaxation of the FCAS requirement is the same amount in both intervened and non-intervened cases.                            |        |
| SET_CSP_DEROGATION_AMOUNT      | A settlement table for the publication of Snowy CSP derogation amounts.   | Public |
| SET_CSP_SUPPORTDATA_CONSTRAINT | A settlements table for the publication of support data for the Snowy CSP derogation amounts. This table publishes the constraint-level information for each five minute interval in the settlement run | Public |

24/03/2021 Page 113 of 117

|                                | 1   |         |
|--------------------------------|---|---------|
| SET_CSP_SUPPORTDATA_ENERGYDIFF | A settlements table for the publication of support data for the Snowy CSP derogation amounts. This table publishes energy differential information for each half-hour interval in the settlement run  | Public  |
| SET_CSP_SUPPORTDATA_SUBPRICE   | A settlements table for the publication of support data for the Snowy CSP derogation amounts. This table publishes substitution price information for each five minute interval in the settlement run | Public  |
| SETAPCCOMPENSATION             | SETAPCCOMPENSATION shows Administered Price Cap (APC) compensation payments for each period.  | Private |
| SETAPCRECOVERY                 | SETAPCRECOVERY shows reimbursements for Administered Price Cap (APC) to be recovered from participants.   | Private |
| SETFCASRECOVERY                | SETFCASERECOVERY shows reimbursements for the Frequency Control Ancillary Services compensation.  | Private |
| SETGOVPAYMENT                  | SETGOVPAYMENTshows specific payment details for Governor services by period.  | Private |
| SETGOVRECOVERY                 | SETGOVRECOVERY shows reimbursements for the Governor Ancillary Services to be recovered from participants.  | Private |
| SETLULOADPAYMENT               | SETLULOADPAYMENT<br>shows specific payment<br>details for rapid unit load<br>services by period.  | Private |
| SETRESERVETRADER               | SETRESERVETRADER shows reserve trader details.  | Private |
| STPASA_SYSTEMSOLUTION          | STPASA_SYSTEMSOLUTIO  | Public  |

24/03/2021 Page 114 of 117

|                     | N is obsolete from 2005 End<br>of Year Release. For solution<br>information, see Region<br>solution tables.           |         |
|---------------------|---|---------|
|                     | STPASA_SYSTEMSOLUTIO<br>N showed the results of the<br>system capacity evaluations<br>for each interval of the study. |         |
| STPASA_UNITSOLUTION | STPASA_UNITSOLUTION shows the unit results from the capacity evaluations for each period of the study.                | Private |
